

Geek Hell AI Development Prompts (Volume 1)

This PDF contains a structured roadmap and 50 prompt titles for Google Antigravity/Gemini. Each prompt should begin with: 'Follow the established project architecture and never rewrite existing code unless requested.'

01 Project Architecture

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

02 Folder Structure

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

03 Dependency Installation

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

04 Express Backend

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

05 MongoDB Models

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

06 Authentication

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

07 Admin Dashboard

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

08 Product CRUD

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

09 Category CRUD

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

10 Upload System

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

11 Cloudinary

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

12 Homepage Layout

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

13 Navbar

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

14 Hero Section

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

15 Marvel vs DC Split

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

16 Featured Products

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

17 Collections

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

18 Footer

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

19 Design System

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

20 GSAP Setup

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

21 Lenis Setup

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

22 ScrollTrigger

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

23 Framer Motion

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

24 React Three Fiber Setup

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

unrelated files.

25 Load GLB T-shirt

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

26 Orbit Controls

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

27 HDR Lighting

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

28 Texture Mapping

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

29 Live Design Preview

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

30 Upload Custom Image

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

31 Move/Scale/Rotate Design

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

32 Front/Back Views

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

33 Shirt Colors

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

34 Shopping Cart

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

35 Wishlist

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

36 Checkout

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

37 Stripe Integration

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

38 User Profile

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

39 Saved Designs

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

40 Orders

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

41 Reviews

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

42 Search & Filters

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

43 Performance

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

44 SEO

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

45 Responsive Design

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

46 Testing

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

47 Deployment

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

48 Analytics

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.

49 Bug Fixing

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify

unrelated files.

50 Final Optimization

Prompt: Build only this module, keep architecture consistent, generate production-ready code with comments, tests where applicable, and do not modify unrelated files.
